

### ▼ Compatibility

- ▶ 1 Add 'filter' to support Chrome 53+, Chrome Android 53+, Samsung Internet 6.0+.

- ▶ ① The 'x-ua-compatible' meta element should not be specified as it is not needed.

## ▼ Performance

- ▶ 5 Resource should use cache busting but URL does not match configured patterns.

- ▶ 1 The target should not be cached or have a 'cache-control' header with 'max-age=180' or less.

- ▶ 5 Static resources should use a 'cache-control' header with 'max-age=31536000' or more.

- ▶ 5 Static resources should use a 'cache-control' header with the 'immutable' directive.

▼ Security

- ▶ 6 Response should include 'x-content-type-options' header.

- ▶ 6 The 'Expires' header should not be used, 'Cache-Control' should be preferred.

- ▶ 6 The 'Via' header should not be used, it is a request header only.

**this week:**  
how much do you  
know about  
netflix?  
play the quiz and  
find out...
