ES6 Syntax Check

An online ECMAScript 6 Checker.

[Check the code] [Reset]

Good! There is no error!

```
const questionNumber = document.querySelector('.question-number');
const questionText = document.querySelector('.question-text');
const optionContainer = document.querySelector('.option-container');
const answersIndicatorContainer = document.querySelector('.answers-indicator');
const homeBox = document.querySelector('.home-box');
const quizBox = document.querySelector('.quiz-box');
const resultBox = document.querySelector('.result-box');
const textBox = document.querySelector('.text-box');
const formElement = document.querySelector('.form-element');
```
